Re: 5090 Ser FE4/1054
Disposal of Investigation-Derived Waste from Site 11

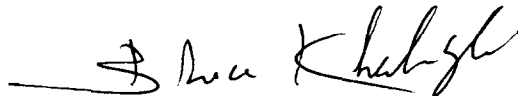

Dear Sir:

We have reviewed your request for permission to dispose of Investigation-Derived Waste ("IDW") from field activities at Site 11, the Old Camden County Landfill. Based on your characterization of the IDW as nonhazardous waste, Subase Kings Bay may dispose of the material as solid waste at a landfill permitted under Subtitle D of RCRA.

In the absence of an approved Corrective Action Plan, and in light of the presence of hazardous constituents, we cannot approve a request to dispose the IDW at Site 11. EPD may consider allowing disposal at Site 11 if the final corrective action includes the installation of an engineered multilayer cap in addition to groundwater treatment and monitoring. Regardless of the presence of IDW, EPD would consider the installation of a multilayer cap an appropriate element of a Corrective Action Plan for Site 11.

If you have questions or comments, please contact Billy Hendricks at (404) 656-2833.

Sincerely,

Bruce Khaleghi, Unit Coordinator
Hazardous Waste Management Branch

c: John Garner, Subase
